

COLOUR

School project

How many colours can you name?

Create your own colour chart

What do you know about colours?

Do you know what two colours make green?

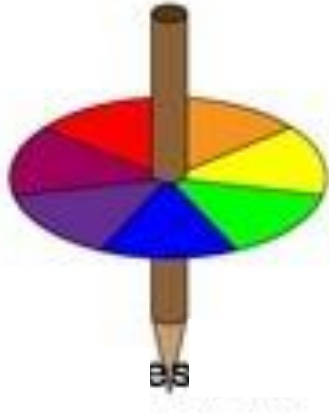

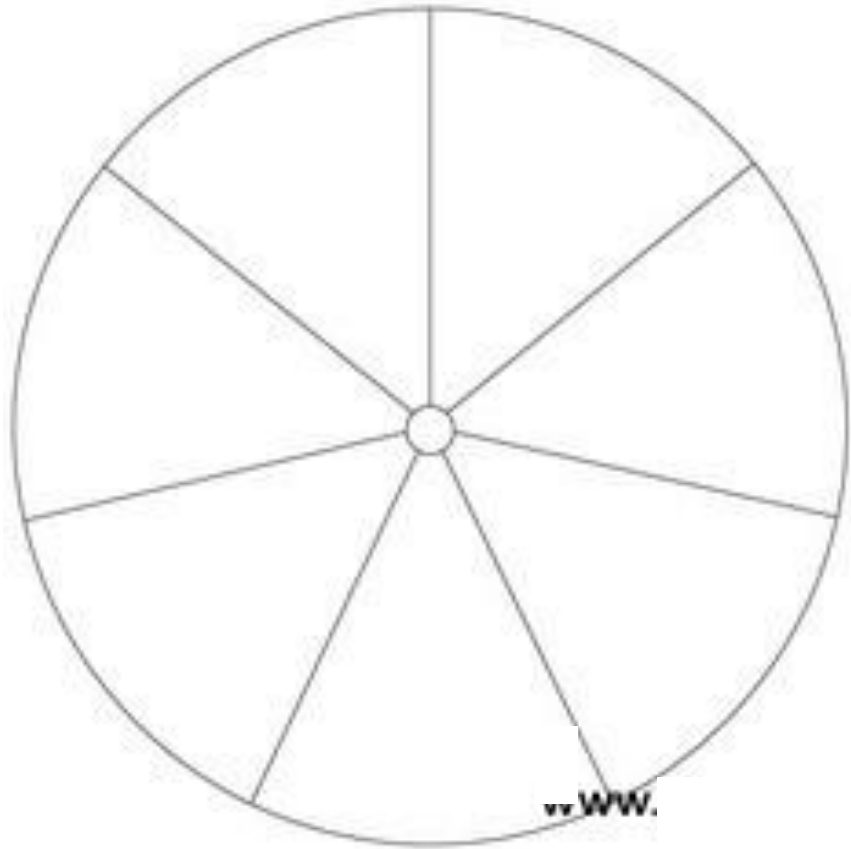

Are there any other colours you can mix?

My own unique tin of paint

- Design your own label and name for your tin of paint – what colour will you choose?

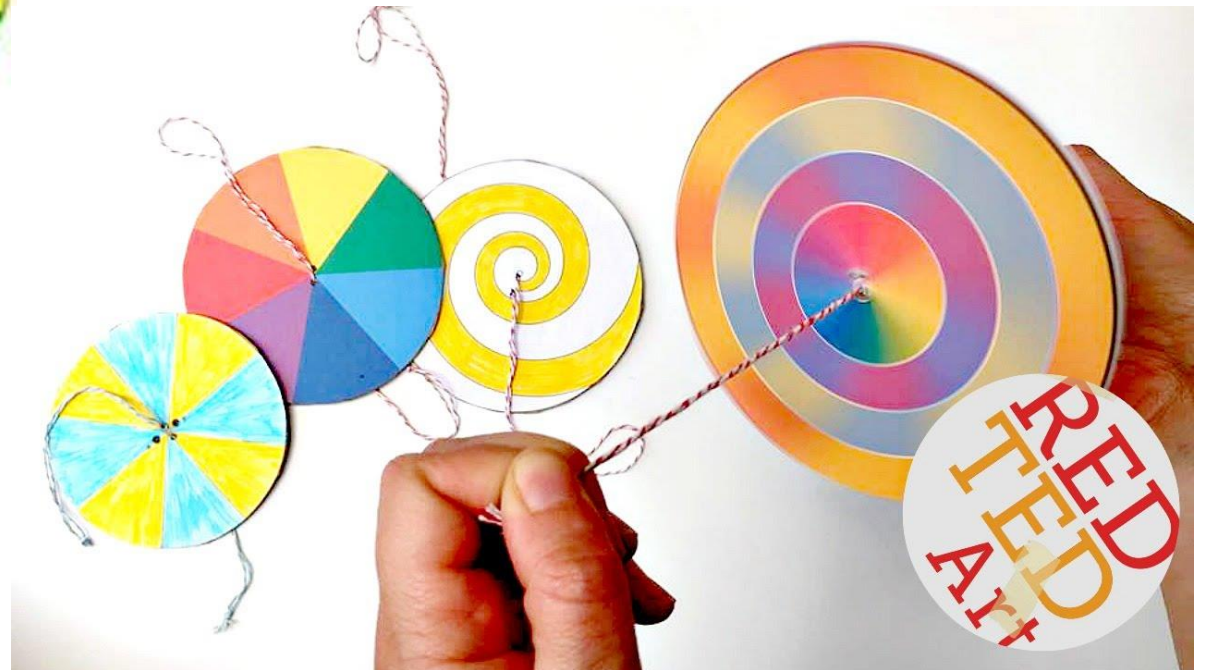

Can you create a picture like this?

Make a spinner and then watch what happens.

What do you see?

Take a colour and see if you can make it lighter and then darker.

This works well with paint if you have some.

Chromatography Butterflies

Science for Kids

BuggyandBuddy.com

You need to get a piece of kitchen roll. Put a small circle of felt tip pen in the middle of it. Then carefully add a tiny amount of water and watch what happens.

Collage

You can use a magazine pictures to cut up or wool, material or any recycled items
