

INVENTIONS

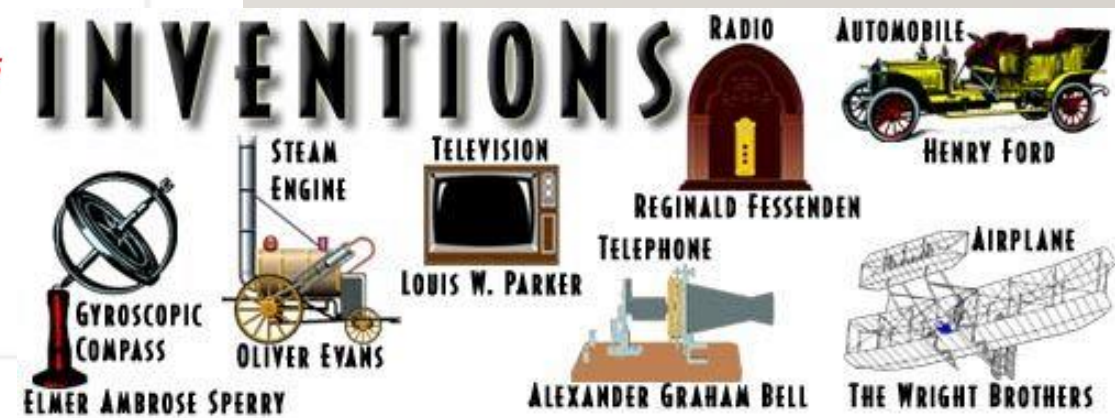

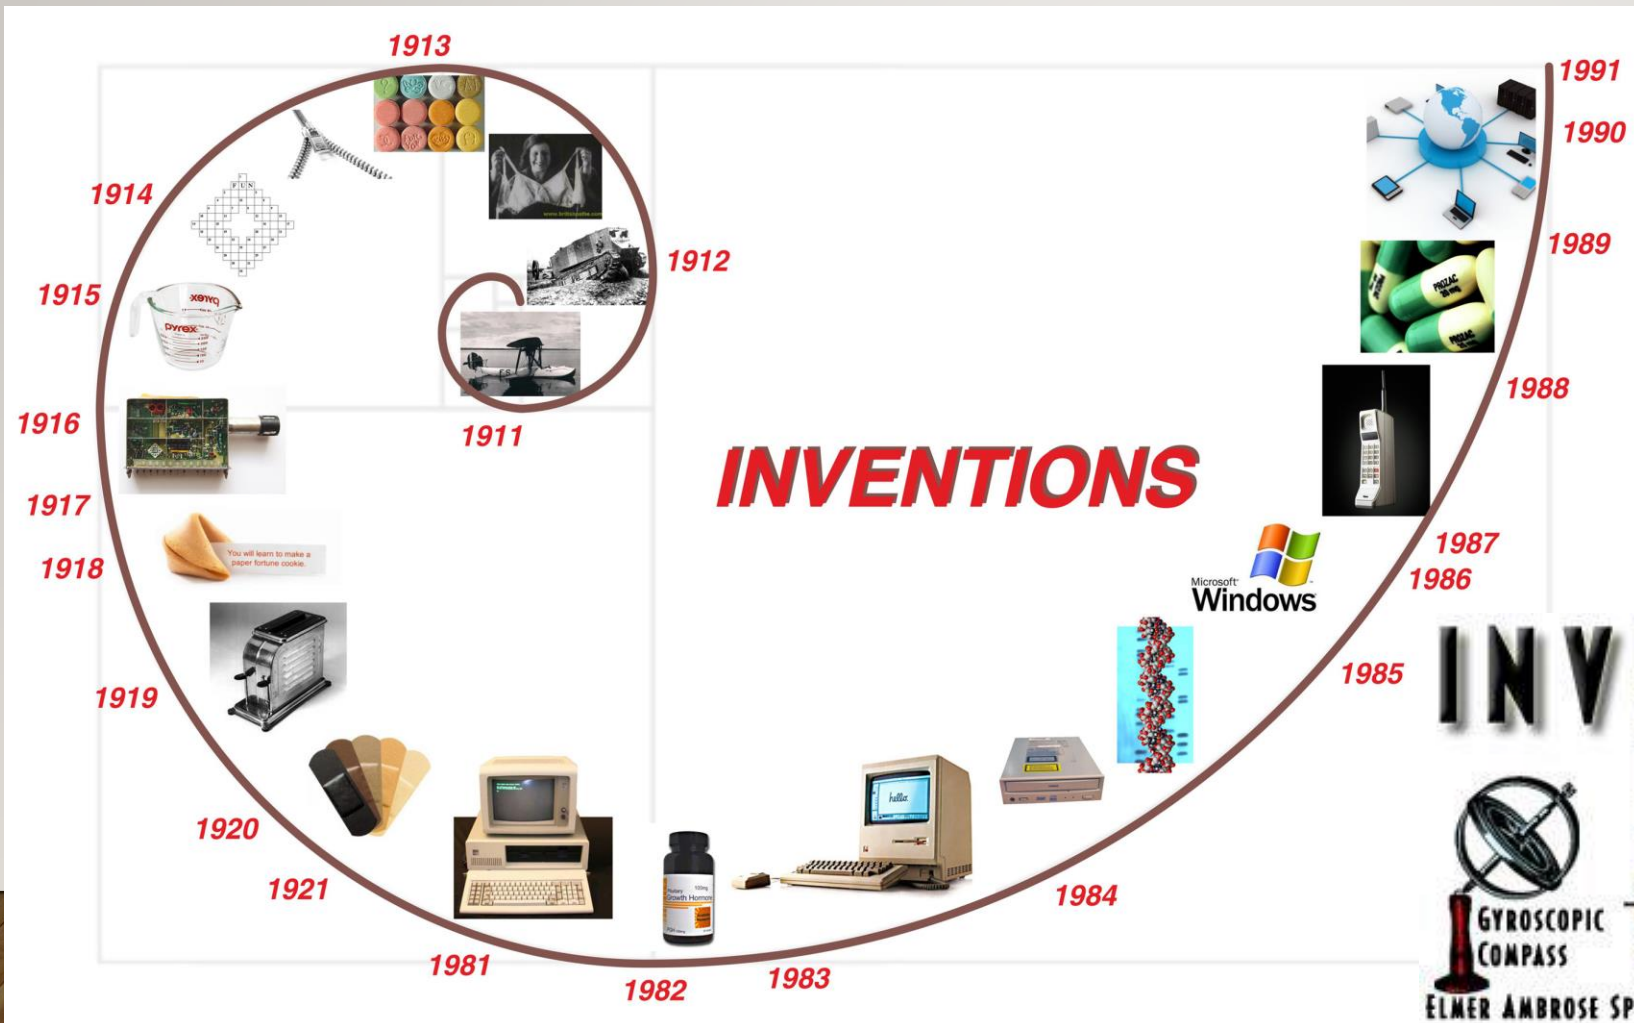

SCHOOL PROJECT

INVENTION TIMELINE...

<https://www.factmonster.com/math-science/inventions-discoveries/timeline-of-everyday-inventions>

Which invention could you not live without? Why?

WHEEL...

Some say the wheel is the best invention.

How many things can you list that use a wheel?

Are there any other products that would be better round?

Invention Of The Wheel

The first wheels were not used for transportation. Evidence indicates they were created to serve as potter's wheels around 3500 B.C. in Mesopotamia—300 years before **someone** figured out to use them for chariots. The ancient **Greeks** invented Western philosophy...and the wheelbarrow.

BRAILLE...

Braille was invented by a nineteenth century man named Louis Braille, who was completely blind.

What can you write in Braille?

0	1	2	3	4	5	6	7	8	9

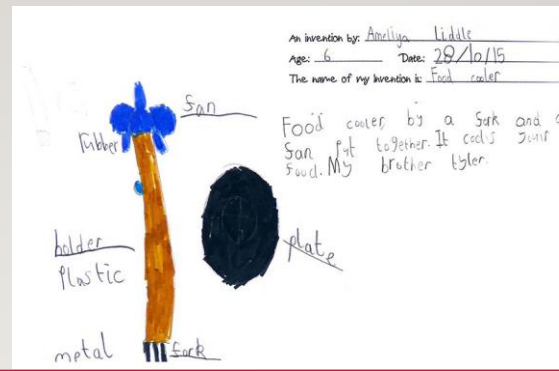

WHAT CAN YOU INVENT?

What can you invent with

- 5 lollipop sticks
- 6 pipe cleaners
- Tin foil
- 2 paper clips
- String
- A pom pom
- tape

YOUR IDEAS

Draw your own idea invention.

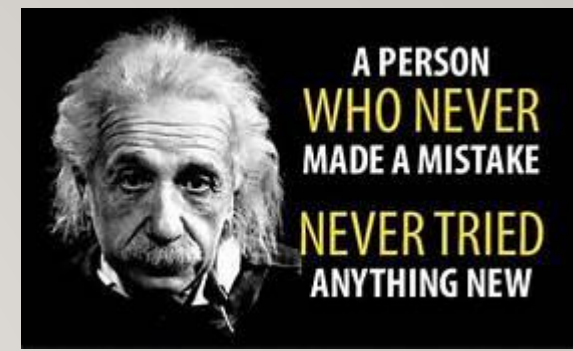

Think about these questions.

Talk to your friends about the answers.

Write about one that interests you.

- If you could invent one thing that would make your life easier, what would you create? Why?
- What do you think is the greatest invention the world has ever seen? Why?
- What skills does it take to be an inventor? Which of these skills do you have?
- How could you practice some of the other skills that inventors have?
- Would you rather come up with an idea for a new invention, or be the person who builds the new invention? Why?
- Do you consider yourself to be an idea person? Why or why not?
- Are you better with big picture ideas or looking at small details? Why are both of these skills an important aspect of inventing?
- Choose a famous inventor from history and discuss his or her impact on the world.

ACCIDENTAL INVENTIONS

Not all inventions were made on purpose!

Create a poster about your favourite accidental invention.
