# MATHS

15.02.22

I can count faces on 3D shapes. A44

What does 2D mean?

Two dimensional  
Flat shape

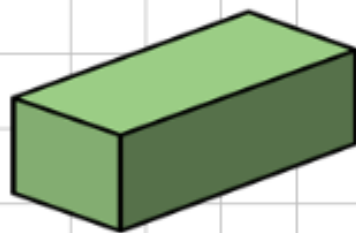

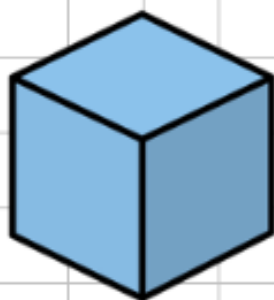

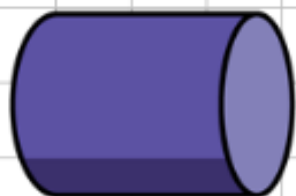

What does 3D mean?

Three dimensional  
The shape can stand up

15.02.22

I can count faces on 3D shapes. A44

Can you remember the name of these 3D shapes?

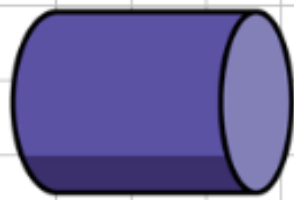

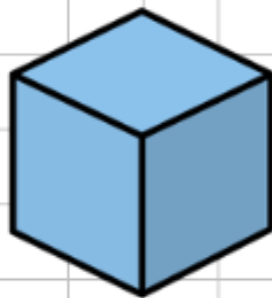

15.02.22

I can count faces on 3D shapes. A44

Can you remember the name of these 3D shapes?

Cylinder

Cube

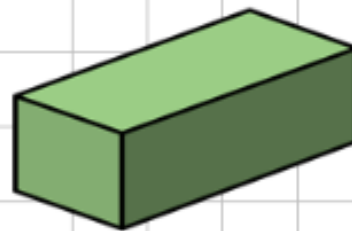

Cone

Sphere

Triangular Prism

Cuboid

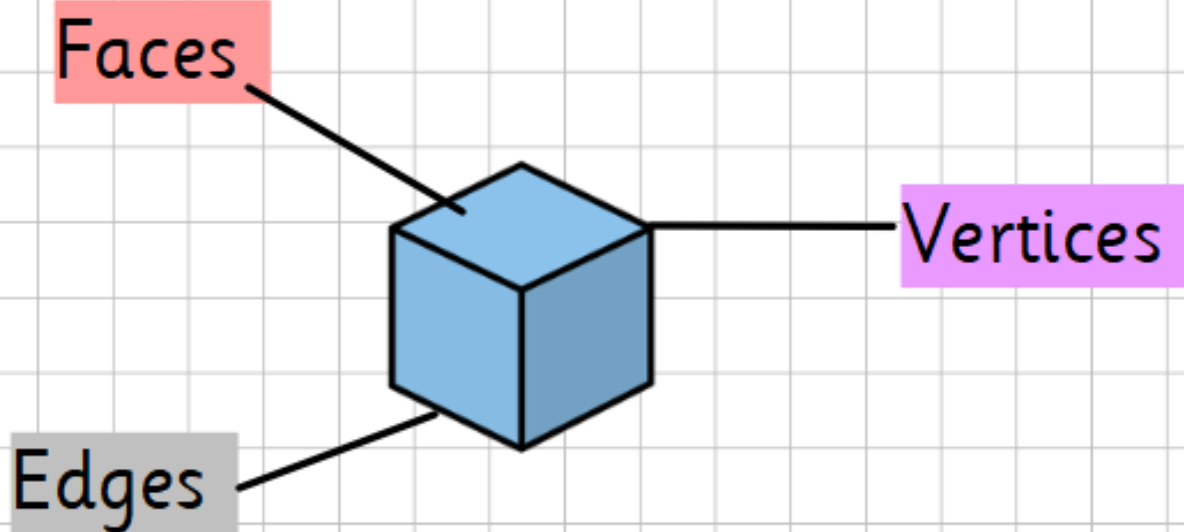

Pyramid

15.02.22

I can count faces on 3D shapes. A44

Let's look at the cube.

We describe a 3D shape by it's -

15.02.22

I can count faces on 3D shapes. A44

Today we are going to look at the faces on 3D shapes.

Look at the cube.

Can you see any 2D shapes on its faces?

How many faces will there be?

Faces

Vertices

Edges

15.02.22

I can count faces on 3D shapes.

A44

Now look at the triangular prism.

Can you see any 2D shapes on its faces?

How many faces will there be?

Faces

Vertices

Edges

15.02.22

I can count faces on 3D shapes.      A44

Have a look at the 3D shapes on the table

How many faces do they have?

Faces

Vertices

Edges

Which 2D shapes can you see on the faces?

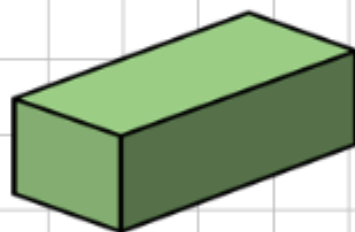

15.02.22

I can count faces on 3D shapes.

Faces

Vertices

Edges

Name

Faces

2D shapes

15.02.22

I can count faces on 3D shapes

Faces

Vertices

Edges

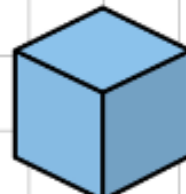

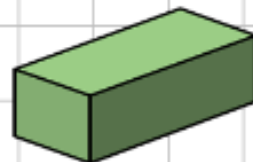

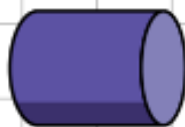

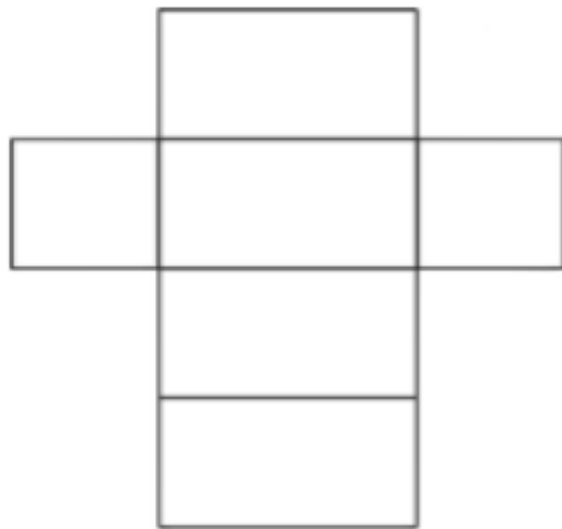

Look at this net

If you cut out and fold along the lines it will make a 3D shape.

Which shape will it make?

How many sides does it have?

Which 2D shapes can you see?

15.02.22

I can count faces on 3D shapes

Faces

Vertices

Edges

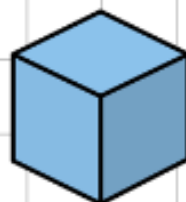

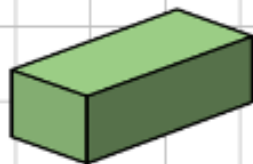

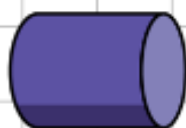

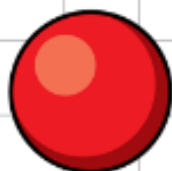

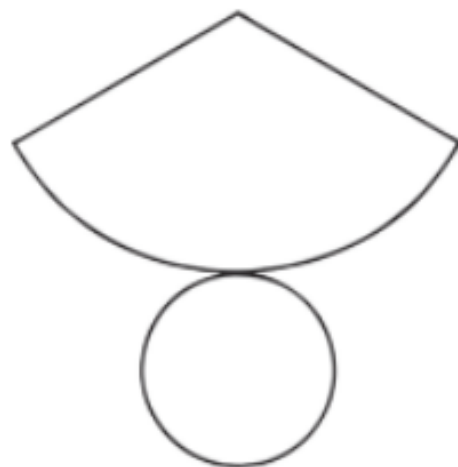

Look at this net

If you cut out and fold along the lines it will make a 3D shape.

Which shape will it make?

How many sides does it have?

Which 2D shapes can you see?

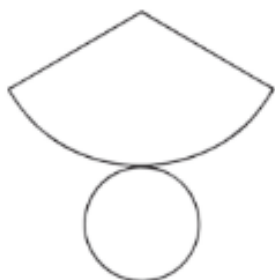

15.02.22

I can count faces on 3D shapes

Faces

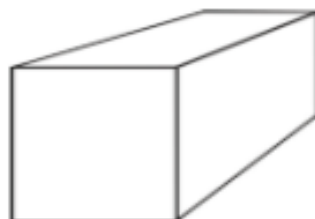

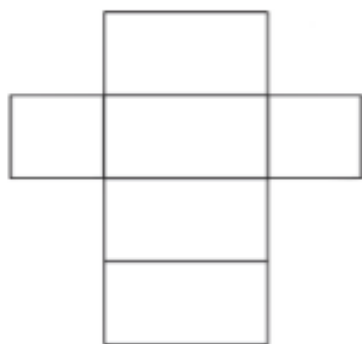

Vertices

Edges

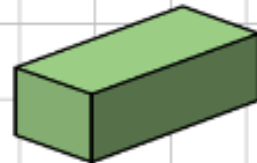

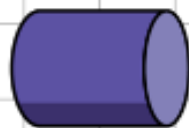

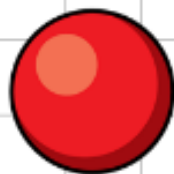

Cone

— faces  
— circular face

Cuboid

— faces  
— square faces  
— rectangular faces
